

The hygienic benefits of straighter teeth

HEALTHIER GUMS

Properly positioned teeth are easier to brush and floss than teeth that are crowded, crooked, or spaced too far apart. Properly aligned teeth can help gums fit more tightly around them,¹ which may lead to better periodontal health.

EASIER CLEANINGS

With maintenance of good oral hygiene, the chances of having plaque retention, tooth decay, or periodontal (gum) disease can be reduced.

DECREASED RISK OF ABNORMAL WEAR

Properly aligned teeth can be less stressful on the supporting bone jaw joints.

SHOW THE WORLD WHO YOU REALLY ARE WITH INVISALIGN CLEAR ALIGNERS

Over 2.7 million patients

are smiling with confidence thanks to Invisalign clear aligners. Without brackets or wires, Invisalign clear aligner treatment takes a modern approach to teeth straightening and is virtually invisible.

Q HOW DOES IT WORK?

A Invisalign® clear aligners take a modern approach to straightening teeth, using a custom-made series of aligners created for you and only you. These aligners are made of smooth, comfortable and virtually invisible plastic that you simply wear over your teeth. Wearing the aligners will gradually and gently shift your teeth into place, based on the exact movements your dentist or orthodontist plans out for you. There are no metal brackets to attach and no wires to tighten. You simply pop in a new set of aligners approximately every two weeks, until your treatment is complete and you achieve the confident smile that you've always wanted. The best part about the whole process is that most people won't even know you're straightening your teeth.

Q HOW MUCH DOES IT COST?

A In most cases, Invisalign clear aligner treatment is comparable to the cost of traditional braces. However, as with other medical treatments, only your doctor can determine the cost, based on your specific needs. Other factors may include your treatment goals, the difficulty of your case, how long you are in treatment, where you live, your orthodontic insurance coverage, and additional factors determined by your dentist or orthodontist.

Q DOES IT REALLY WORK?

A Yes. More than 2.7 million people worldwide have been treated with Invisalign clear aligners. The number of Invisalign smiles grows daily.
